

YASHWANT SINGH RAWAT

828-753-6360 | yashwantsinghrawat696@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

EDUCATION

Guru Gobind Singh Indraprastha University

New Delhi

Bachelor of Computer Application, GPA 8.8, [credentials](#)

Sept 2023 – Jun 2026

Jinvani Bharti Public School

New Delhi

Commerce with Maths

Mar 2009 – Mar 2023

SKILLS

- ✓ **Programming Languages:** C/C++, Java, Python
- ✓ **Web Development:** HTML5, CSS, React, PHP
- ✓ **Database Management:** MySQL, PostgreSQL, SQL Workbench
- ✓ **Other Skills:** Power BI, Automation, Linux, Cloud Computing, Prompt Engineering
- ✓ **Creative Skills:** Video Editing, Music Remixing, AI Image Generation, Graphics Designing

PROJECTS

- **Void Whispers** [Paranormal Website] | Typescript, React, Node.js, Supabase | [GitHub](#) | [Live](#)
 - Developed an informational website focused on the research and documentation of paranormal phenomena.
 - Utilized Supabase as a Backend-as-a-Service (BaaS) for efficient data storage and retrieval, implementing secure authentication and real-time database capabilities and built a responsive and interactive user interface to provide a smooth and intuitive user experience.
- **Crystalytics** [Diamond Carat Prediction] | Python, Streamlit | [GitHub](#) | [Live](#)
 - Developed a machine learning regression model to predict diamond carat weight based on physical dimensions and quality metrics.
 - Cleaned dataset up to 50k rows with handle missing values, duplicate entries, and outliers, ensuring data integrity and model reliability. and used different regression algorithms like linear, decision tree, random forest, support vector and naïve bayes but random forest has given best accuracy with near perfect prediction.
- **RiskGuard** [Stroke Prediction Model] | Python, Streamlit | [GitHub](#) | [Live](#)
 - An advanced ensemble machine learning model designed to predict the likelihood of stroke occurrence based on various health and lifestyle factors.
 - Utilizing classification algorithms, the model analyzes patient data to identify high-risk individuals, enabling early intervention and preventive care and comprehensive preprocessing with feature scaling, encoding, and imbalance handling techniques.
- **CCDC-X** [Car Color Detector & Counter] | Python, Streamlit | [GitHub](#) | [Live](#)
 - a pre-trained yolov8 model to detect car colors from images. The system utilizes computer vision techniques to accurately identify and count vehicles based on their color attributes
 - it takes an input image, processes it through the model, and outputs the detected car colors along with their respective counts.
 - its uses thresholding, contour detection, and color classification to achieve high accuracy in diverse lighting conditions.

- **Nix [Mental Healthcare Bot]** | Python, Streamlit | [GitHub](#) | [Live](#)
 - Empathetic AI chatbot powered by advanced natural language processing and sentiment analysis for mental health support.
 - The system uses transformer models, emotion recognition, and therapeutic conversation patterns to provide personalized assistance.
 - Features include mood tracking algorithms, crisis detection mechanisms, and evidence-based therapeutic interventions

EXPERIENCE

Data Science Intern | Nulll Class

Oct 2025 – Nov 2025

- Developed and deployed a predictive machine learning model i.e car color prediction model, nationality detection model to forecast object detection and face recognition with 80% accuracy.
- Engineered features and performed extensive data cleaning/preprocessing on large-scale datasets and visualized the model performance using different evaluation metrics.

Research Intern | Suvidha Foundation

Sept 2025 – Oct 2025

- Completed a research internship focused on Large Language Models (LLMs) and modern transformer architectures such as encoder-only, decoder-only, and encoder-decoder transformers.
- Strengthened conceptual foundations in deep learning–based language systems without hands-on project implementation.

EXTRACURRICULAR

Graphics Designer | AIEC Society (IITM)

Aug 2025 - Present

- Designed graphics, event posters, and social media creatives.
- Ensured brand consistency and visual appeal across various platforms.

Video Editor | Nexverse Society (IITM)

Oct/2024 - Apr/2025

- Collaborated with the team to conceptualize and execute video projects from start to finish.
- Managed and organized video assets, ensuring a streamlined post-production workflow.

ACHIEVEMENTS

- #1 in Data Decode Competition
- Shortlisted in Internal Hackathon for SIH 2025
- Participated in Graphic Designing Competition

HOBBIES

- Listening music and remixing it into different paces.
- Creating video edits of anime.
- Interested in playing open world/F2P games.
- Enthralled about new technology.
- Intrigued in understanding new AI tools.
